

NRIPENDU SHARMA

PRODUCT MANAGER | AI-ENABLED ENTERPRISE PRODUCTS • 0→1 SHIPPING • EVALS-FIRST PRACTICE
nripendusharma@outlook.com • +91 7704999201 • India • [LinkedIn](#) • [Portfolio](#) • [Substack](#)

This is my **base resume**. Happy to tailor it to your organization's specific role and requirements. Drop me a mail at nripendusharma@outlook.com.

PROFESSIONAL SUMMARY

Product leader with 8+ years shipping AI-enabled enterprise, GovTech, and HR Tech products end-to-end: discovery through delivery, with senior-executive and IAS-level stakeholder ownership. Practices a rules-before-AI phased approach on live production systems and writes behavior specs and eval harnesses before the feature. Uses **Claude Code**, **Cursor**, **GitHub Copilot**, and **ChatGPT** to accelerate PRD drafting, prototyping, and evaluation design; personally ships live AI products (Voyogo) using the same tools. Fluent in SCRUM, PI planning, KPI definition, and cross-functional influence without direct authority. Writes the receipts, publishes them, and treats post-launch measurement as the product.

PROFESSIONAL EXPERIENCE

Product Consultant, Uttar Pradesh Power Corporation Limited

AI-Enabled Enforcement & Revenue-Recovery Platform (B2B / GovTech)

India
2024 to Present

Owns end-to-end lifecycle of a 0-to-1 AI enforcement platform serving 35K+ field officers across 20 districts.

- Owned **end-to-end product lifecycle** of a 0-to-1 AI-enabled enforcement platform: discovery, behavior specs, PRDs with acceptance criteria (functional, security, audit trails), sprint delivery, GTM, and post-launch iteration across a team of **12 engineers and 2 designers**.
- Shipped a **6-month MVP** to production, then scaled to **35K+ field officers across 20 districts**, driving **\$1M ARR uplift (14% lift)** and reducing regional theft by **~20 MW/quarter** (~7% of regional load).
- Ran **rules-first Phase 1** with deterministic anomaly detection; introduced **ML-driven detection in Phase 2** behind a closed-loop eval system, lifting detection precision from a **0% baseline to 23%** and operational efficiency from **15% to 38%**.
- Designed behavior specs, golden datasets, and human-in-the-loop supervisor gates before shipping AI to the field; treated **evals as regression tests** and **audit trails as core** to anti-corruption enforcement policy.
- Managed **IAS-level state leadership and senior executive stakeholders**, translating field pain into a prioritized backlog aligned to legal, operational, and technical constraints; ran external vendor on my sprint cadence, SLAs, and acceptance criteria.

Product Manager, Talview

Global Enterprise B2B SaaS, Candidate Experience

Bengaluru, India
2022 to 2023

Owned Candidate Experience for global enterprise brands serving 100K+ candidates annually.

- Owned product enhancements to a Candidate Experience platform for global enterprise (**Cisco**, **Nvidia**, **Cambridge Assessment**), serving **100K+ candidates annually across 15+ countries**; lifted **NPS by +29 points to +65** and drove **CSAT up 35%**.
- Led a **friction-audit driven redesign** using funnel analytics: identified 65% of drop-offs at the hardware-check step, moved permissions to the moment of relevance, and lifted **net conversion by 60%** while cutting **time-to-first-value 40%**.
- Delivered **WCAG 2.1 AA accessibility compliance** to unlock enterprise procurement; managed **2 direct-report PMs** and onboarded 1 new PM to the CX team.

Product Manager, Magnus IT Solutions

Enterprise SaaS, Document Management & Workflow (B2B / GovTech)

India
2018 to 2022

Owned a Document Management System across 14+ state government and enterprise clients.

- Led product turnaround of a Document Management System across **14+ state government clients**: pruned unnecessary fields, matched state-tender technical benchmarks, and tripled **Customer Retention Rate from 15% to 45%** with a **25% renewal-rate increase**.
- Cut **file turnaround time 60%** (48+ hrs to ~19 hrs) by aligning system architecture to the actual daily user (govt clerk) rather than the buyer (senior administrative official).
- Started as Business Analyst; moved into PM; completed Executive MBA at NMIMS Mumbai in parallel.

PROJECTS

Voyogo – AI-Native Travel Diary, Shipping in Public

Founder • voyogo-app.vercel.app • 2026

- Built an **evals-first AI product**: behavior spec and a **30-trip golden dataset** committed before feature code, with programmatic checks on hard constraints and **LLM-as-judge with human calibration** on semantic behaviors.
- Coded and shipped a live web product personally using **Claude Code** and **Cursor**; publishes baseline scorecards, production failures, and eval fixes as receipts on Substack.

CORE SKILLS

Product Management: Full product lifecycle, product vision & roadmap, backlog prioritization, PRDs, user stories with acceptance criteria (functional, security, data compliance), GTM strategy, competitive benchmarking

Discovery & Research: Field interviews, prototype validation, hypothesis testing, market research, customer feedback loops, behavioral analytics, A/B experimentation

Agile & Delivery: SCRUM, PI (Program Increment) planning, backlog refinement, sprint planning, product demos, product-design-engineering trio collaboration, end-to-end delivery ownership

AI-Augmented PM Practice: Claude Code, Cursor, GitHub Copilot, Windsurf, ChatGPT; behavior specs, eval harnesses, golden datasets, LLM-as-judge with human calibration, human-in-the-loop workflows, closed-loop measurement

Data & Analytics: KPI definition (adoption, efficiency, outcome), Mixpanel, SQL (working analysis), dashboard design, A/B test methodology, funnel analysis, data-driven prioritization

Cross-Functional & Communication: Cross-functional influence without direct authority, executive storytelling (C-level and IAS-level), stakeholder management, direct enterprise customer research, advanced written and spoken English

EDUCATION

MBA, Business Management, NMIMS, Mumbai

2019 to 2021

B.E., Civil Engineering, Ramaiah Institute of Technology, Bengaluru

2010 to 2014
