SUMMARY

Product Manager with **8 years of experience** building and scaling enterprise **SaaS products (B2B and B2B2C)** across **GovTech and HRTech**. Owned product strategy, user experience, and go-to-market end-to-end, aligning executive stakeholders and cross-functional engineering, design, customer success, and marketing teams around clear OKRs, and grounding decisions in user discovery, experimentation, and data. Consistently converts ambiguous, high-stakes problems into measurable business outcomes.

RELEVANT EXPERIENCE

Uttar Pradesh Power Corporation Limited (GovTech) (B2B)

Lucknow, Uttar Pradesh

Product Consultant

2024 – Present

- Drove **\$7M (14%) ARR** revenue uplift by scaling data-driven electricity theft detection and streamlining bill recovery workflows, translating fragmented field operations into measurable collection.
- Shipped an enforcement **MVP to 8K+** field officers (primary persona) across 5 districts in **6 months** by leading structured **user discovery and adoption** with frontline officers and IAS-level leadership, translated field observations into a prioritized feature spec covering consumption anomalies, meter data, and geolocation signals.
- Unlocked **project funding (\$50M)** after MVP success by leading the design of a **high-fidelity prototype** that turned an abstract vision into a tangible, demonstrable product, closing an operational enforcement to revenue loop, architected around transparency by design (audit trails, traceable actions) to directly address **anti-corruption** policy.
- Orchestrated the **0→1** delivery end-to-end. Created key sections of the **product strategy** and **roadmap** from scratch, balancing user requirements with org **vision**; authored PRDs, problem statement, and integration specs (APIs) that increased **operational efficiency** from **15% to 38%** aligning enforcement teams behind a single sequence of releases.
- Led a **cross-functional** engineering (12) and design team (2) against clear **OKRs** to digitize the workflow replacing manual tracking of revenue collection with an auditable system of record that drove a **15% increase** in realized revenue.
- Directed an external technology vendor as an embedded extension of the product team instituting sprint cadence, delivery SLAs, and clear **acceptance criteria** into a **prioritized backlog** that kept iterative releases predictable and on-quality.
- Conducted in depth analysis, a closed-loop **feedback** system that fed post-raid outcomes back into the anomaly detection that impacted detection accuracy from a **0% baseline to 23%** and reduced power loss by **20MW** (7% of regional load).

Talview (HRTech) (B2B2C)

Bengaluru, Karnataka

Product Manager

2022 – 2023

- Improved customer satisfaction (**CSAT**) by **35%** within **3 months of launch**. Owned enhancements to the Candidate Experience for enterprise clients across **15+ countries**, accountable for candidate **satisfaction, onboarding and adoption** in online assessments through a user-centric, **elevated CX** approach driven by **feedback** and **data analysis**.
- Lifted **NPS by +29** points by leading an end-to-end candidate app redesign that instrumented score tracking to isolate the highest-friction moments and prioritized fixes by impact-to-effort framework.
- Led migration of Candidate Experience off legacy systems while simultaneously **revamping the UX** delivering **35% system reliability gain**, **NPS lift to +65**, and **40% onboarding-time reduction** across **100k+ candidates** at Cambridge Assessments, Cisco, Nvidia enterprises **proving** platform investments and customer outcomes are not a **tradeoff**.
- Cut candidate **time-to-value by 40%** by leading a friction-audit-led redesign of the onboarding flow, instrumented the activation funnel to isolate drop-off, eliminated 3 high-abandonment steps, and shipped contextual in product nudges validated through **A/B tests** across 11 cohorts.
- Increased **feature adoption by 56%** by analyzing **behavioral usage** data in Mixpanel to identify the engagement decay across the candidate lifecycle and shipping personalized re-engagement triggers that deepened **WAU (38 to 63)%**.
- Owned the **go-to-market** for a redesigned candidate experience rolled out across enterprise accounts globally, compressed time-to-first-value (**TTFV**) by **40%** through a phased, enablement-led launch that accelerated activation and helped **unlock new accounts** requiring WCAG 2.1 AA accessibility.

Magnus IT Solutions (GovTech) (B2B)

Lucknow, Uttar Pradesh

Product Manager

2018 – 2022

- Spearheaded **user retention** for the Digital File Management System (DMS) across 14+ state government clients, digitizing workflows to **reduce turnaround time by 60%** and **decrease churn by 5%**.
- Pioneered product discovery by interviewing key user personas and **prioritized the OKRs** around user problems with business acumen, leading to **increased Customer Retention Rate (CRR) from (15 to 45)%**.
- Established a **competitive moat** that became the cited reason for an **increased renewal rate by 25%** in post-purchase surveys, and revamped the platform by meeting the technical specifications required to become L1 in the tender qualification.

EDUCATION

MBA (Business Management), Narsee Monjee Institute of Management and Studies, Mumbai

2019-2021

Bachelor of Engineering (Civil), Ramaiah Institute of Technology, Bengaluru

2010-2014
